ENGINEERED FROM EXPLORATION MADE FOR ADVENTURE

The re-engineered Arctic Trucks Toyota Hilux has driven to both poles and far beyond, with over 300,000km travelled across the Antarctic.

Arctic Trucks Toyota Hiluxes became the first vehicles to reach the Magnetic North Pole for BBC Top Gear's Polar Special. Our extreme-mobility vehicles have also achieved many other world records and firsts, including the fastest journey to the South Pole, the first expedition to drive through all seven continents and the longest expedition in polar history.

Arctic Trucks have supplied around 10,000 vehicles to private and commercial customers worldwide, who seek improved mobility, handling and a 'striking' appearance from their favourite pick-up or four-wheel drive vehicle.

Our exploration-proven vehicles are engineered to enable the success of any expedition, work or leisure outing, every time. Irrespective of the terrain, Arctic Trucks vehicles will allow you to 'explore without limits', even under the most challenging driving conditions.

In other words, we have tamed environments others simply do not account for.

Hilux AT44 polar vehicle

Model shown features optional accessories

You don't need to be a polar explorer to own an Arctic Truck. Our vehicles are equally at home in the wilds of the countryside, desert or city.

The Toyota Hilux Arctic Trucks AT35 is fitted with 35" tyres on 17x10 wheels. We have also upgraded and raised the suspension by 40mm. This provides higher ground clearance, better traction, a smoother ride and higher all-round visibility.

The Toyota Hilux Arctic Trucks AT35 is a completely re-engineered high mobility vehicle, incorporating significant enhancements to the body, drivetrain, suspension, wheels, tyres and bodywork. The AT35 builds on the superb ride, handling and mobility offered by the standard Toyota Hilux model upon which it is based.

The larger, increased offset wheels and 35" tyres are accommodated within a custom-designed, widened front and rear fender package. Matched with fully-optimised suspension custom built to AT specifications, the new Toyota Hilux Arctic Trucks AT35 offers an improved presence and performance that is noticed everywhere, whether on or off-road.

The 'large tyre mobility' concept pioneered by Arctic Trucks improves the ride, handling and mobility of the Hilux AT35 on country lanes, compacted or muddy tracks as well as sand and snow. The AT35 is also an accomplished road car with impeccable ride and handling.

TOP PLATFORM

The Toyota Outstanding Performance (TOP) platform uses fewer welding joints, for greater strength and rigidity.

RE-ENGINEERED SUSPENSION

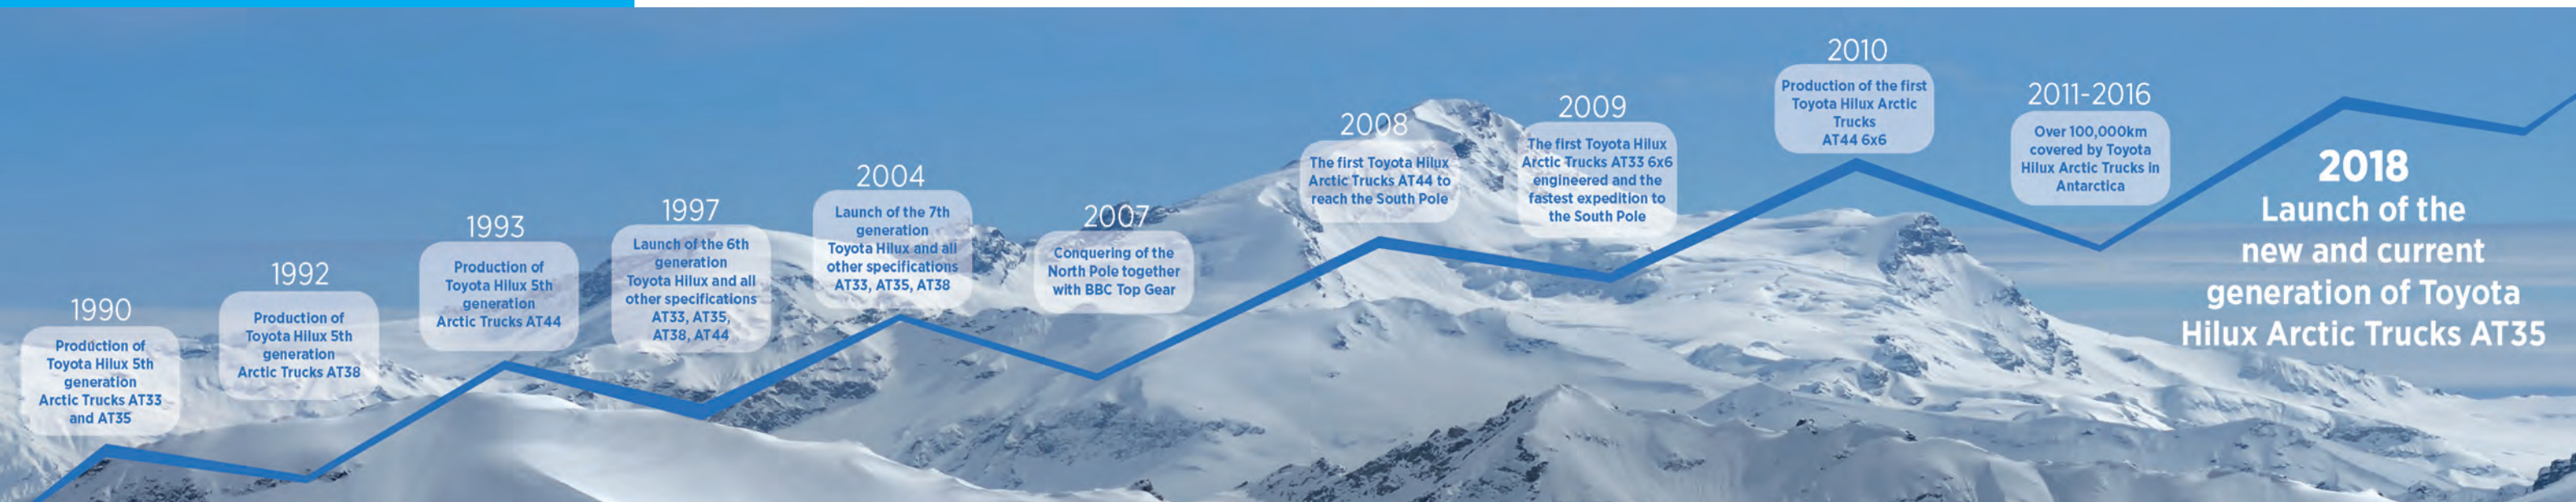

The Hilux AT35's suspension has been completely re-engineered. In addition to fitting 35" tyres on 17x10 wheels we have also raised the suspension by 40mm, increasing both approach and departure angles.

STAND OUT FROM THE CROWD

Standing 7.5cm taller and 13.5cm wider than a standard Hilux, the signature muscular look of the Toyota Hilux Arctic Trucks AT35 delivers incredible road presence and makes a statement about what this vehicle is truly capable of.

ARCTIC TRUCKS TOYOTA HILUX – THE LEGEND

The Arctic Trucks Toyota Hilux is a legend in its own right. Over the years we have evolved the Arctic Trucks Hilux range to be a superlative in four-wheel drive vehicles. The Hilux AT35 has been developed using decades of direct operational experience in some of the harshest and most challenging conditions on our planet. As a result, Arctic Truck owners and operators can truly 'explore without limits'.

Model shown features optional accessories
